iceland became one of the symbols of the global financial crisis it provides an ideal test case for the perceptions of economists in

particular their ability to anticipate crises the book contains papers and reports written prior to the collapse of iceland s financial system about the economy what did and didn t they see coming and why

warnings of the threat of an impending financial crisis are not new but do we really know what constitutes an actual episode of crisis and how once begun it can be prevented from escalating into a full blown economic collapse using both historical and contemporary episodes of breakdowns in financial trade contributors to this volume draw insights from theory and empirical data from the experience of closed and open economies worldwide and from detailed case studies they explore the susceptibility of american corporations to economic downturns the origins of banking panics and the behavior of financial markets during periods of crisis sever papers specifically address the current thrift crisis including a detailed analysis of the over 500 fslic insured thrifts in the southeast and seriously challenge the value of recent measures aimed at preventing future collapse in that industry government economists and policy makers scholars of industry and banking and many in the business community will find these timely papers an invaluable reference

this book is one of a series of various doctoral research project papers and has been further refined and converted into a book the book has been deemed one of further versions of management science that are to come these further versions focus more on information technology and its effects as agile tools for management including software engineering algorithms and data structures computer architecture and electronics systems science artificial intelligence and robotics quantum science statistics and web internet and multimedia design and building managers are usually multifaceted with multiple disciplines even though they have one or two areas as majors specialties or experience it is in the light of this that management science featuring micro macro economics and management of information technology was designed in this context to contain economics with it as a course of study in the future further versions will be pure courses instead of combinations the world has changed gear for the better due to the advanced mysteries of information technology innovations so that we could even conduct scientific laboratory experiments medical diagnoses and rule of law adjudications online that means we could not forget information technology as one major tool in hand that should be a pivot on and around which all other areas in management should dwell and revolve and this was one of the sole reasons of this book it is therefore

worthy of note for readers aspiring as systems analysts managers and professionals to accustom themselves to the subject areas in the book to instill understanding of numerous important terms and points in economics and it this will help to build further courage and understanding toward advancement in these fields all topics indicated in the table of contents have been made reader friendly and treated to focus easy understanding we highly acknowledge all the intellectual materials used

in the late 1990s economic and financial crises raged through east asia devastating economies that had previously been considered among the strongest in the developing world the crises eventually spread to russia turkey and latin america and impacted the economies of many industrialized nations as well in today s increasingly interdependent world finding ways to reduce the risk of future crises and to improve the management of crises when they occur has become an international policy challenge of paramount importance this book rises to that challenge presenting accessible papers and commentaries on the topic not only from leading academic economists but also from high ranking government officials in both industrial and developing nations senior policymakers at international institutions and major financial investors six non technical papers each written by a specialist in the topic provide essential economic background introducing sections on exchange rate regimes financial policies industrial country policies imf stabilization policies imf structural programs and creditor relations next personal statements from the major players give firsthand accounts of what really went on behind the scenes during the crises giving us a rare glimpse into how international economic policy decisions are actually made finally wide ranging discussions and debates sparked by these papers and statements are summarized at the end of each section the result is an indispensable overview of the key issues at work in these crises written by the people who move markets and reshape economies and accessible to not just economists and policymakers but also to educated general readers contributors montek s ahluwalia domingo f cavallo william r cline andrew crockett michael p dooley sebastian edwards stanley fischer arminio fraga jeffrey frankel jacob frenkel timothy f geithner morris goldstein paul keating mervyn king anne o krueger roberto mendoza frederic s mishkin guillermo ortiz yung chul park nouriel roubini robert rubin jeffrey sachs ammar siamwalla george soros
