the history of philosophy is like an epic novel there are revered ancestors who through great suffering establish traditions for the betterment of their descendants there are black sheep of the family who stir up trouble embarrass their brothers and sisters and sometimes even invite the wrath of political and religious authorities there are bitter feuds between families that last generations often with no clear victor ever emerging as the saga passes from one era to another there is some feeling of progress old fashioned ways are discarded and replaced with new although sometimes faddish ones thus the history of philosophy is an adventure of ideas to use the words of one great philosopher this book attempts to describe a major thread of that drama

this volume collects reflections on the role of philosophy in case studies in the history of science case studies have played a prominent role in recent history and philosophy of science they have been used to illustrate question explore or explicate philosophical points of view even if not explicitly so historical narratives are always guided by philosophical background assumptions but what happens if different philosophies lead to different narratives of the same historical episodes can historical case studies decide between competing philosophical viewpoints what are the criteria that a case study has to fulfill in order to be philosophically relevant bringing together leading practitioners in the fields of history and philosophy of the physical and the life sciences this volume addresses this methodological problem and proposes ways of rendering explicit philosophical assumptions of historical work

the traditional topics of the philosophy of nature space time causality the structure of the universe are overwhelmingly present in our modern scientific theories this book traces the complex paths that discussion of these topics has followed from plato and aristotle through descartes leibniz kant and other great thinkers right up to the relativistic cosmologies and the grand unified theories of contemporary science in the light of this historical development it becomes clear that modern science gives us not only a technological power over the world but also a deeper understanding of physical reality in this sense science could be regarded as an heir to the traditional philosophy of nature moreover the reader will learn why science itself deserves to be the subject of philosophical reflection

based directly on the standard german edition by johannes hoffmeister this translation presents hegel s vision of history in a lucid accessible form that captures the nuances of his thought

scientific history of philosophy was one of the professional branches of soviet philosophy and a place where philosophical culture was preserved in an often hostile environment situated between the ideological exigencies of the soviet system with its marxist leninist theoretical foundation and the need for an objective account of philosophy s past soviet history of philosophy displays the characteristic features of soviet philosophy as a whole including a forceful reappearance of its hegelian background this book is the only western monograph on this important part of soviet philosophy thus filling the last main gap in western philosophical sovietology at the same time it offers the first survey of soviet philosophy after the disappearance of the soviet system itself embarking on an historical and meta philosophical investigation of soviet philosophical culture the book will be of interest to students of soviet and russian philosophy historians of philosophy and specialists in soviet studies

philosophy of science came into its own in the 20th century but the issues at the heart of the

subject have been in discussion since antiquity philosophy of science an historical anthology combines excerpts from key historical writings with insightful commentary to provide a text that distinctively follows strands of scientific inquiry investigation and debate for the past 2 500 years beginning with the ancient greeks part i examines the roots of ancient and medieval philosophy of science before proceeding to the scientific revolution with extensive coverage of such scientists as copernicus kepler galileo and newton as well as modern philosophers including descartes hume and kant part ii covers philosophy of science in the 20th century first laying out the fundamental doctrines of the highly influential logical positivist movement and the emergence of its received view of scientific theories it then traces the challenges to the received view and the impact of those challenges on issues in contemporary philosophy of science such as confirmation and observation methodology and realism unmatched in breadth and depth philosophy of science an historical anthology is a comprehensive work that will take the reader on a grand tour of the philosophy of science from antiquity to the modern age

this popular text has now been revised to ensure that it continues to meet the needs of the growing number of people interested in all the main philosophical traditions of the world introduces all the main philosophical systems of the world from ancient times to the present day now includes new sections on indian and persian thought and on feminist and environmental philosophy the preface and bibliography have also been updated written by a highly successful textbook author

the year 2012 marks the 50th anniversary of the publication of thomas s kuhn s the structure of scientific revolutions up until recently the book s philosophical reception has been shaped for the most part by the debates and the climate in philosophy of science in the 1960s and 1970s this new collection of essays takes a renewed look at this work this volume concentrates on particular issues addressed or raised in light of recent scholarship and without the pressure of the immediate concerns scholars had at the time of the structure s publication there has been extensive research on all of the major issues concerning the development of science which are discussed in structure work in which the scholars contributing to this volume have all been actively involved in recent years they have pursued novel research on a number of topics relevant to structure s concerns such as the nature and function of concepts the complexity of logical positivism and its legacy the relation of history to philosophy of science the character of scientific progress and rationality and scientific realism all of which are brought together and given new light in this text in this way our book makes new connections and undertakes new approaches in an effort to understand the structure s significance in the canon of philosophy of science

this book presents a series of case studies and reflections on the historiographical assumptions methods and approaches that shape the way in which philosophers construct their own past the chapters in the volume advance discussion of the methods of historians of philosophy while at the same time illustrating the various ways in which philosophical canons come into existence debunking the myth of analytical philosophy's ahistoricism and providing a deeper understanding of the roles historiographical devices play in philosophical thought more importantly the contributors attempt to understand history of philosophy in connection with other historical and historiographical approaches contributors engage classical history of science sociology of knowledge history of psychology and historiography in dialogue with historiographical practices in philosophy more narrowly construed additionally select chapters adopt a more diverse perspective by making place for non western approaches and for efforts to construe new philosophical narratives that do justice to the voice of women across the centuries historiography and the formation of philosophical canons will be of interest to researchers and advanced students working in history of philosophy meta philosophy philosophy of history historiography intellectual history and sociology of knowledge

established in 1895 as the first u s scholarly journal in its field *ajs* remains a leading voice for analysis and research in the social sciences presenting work on the theory methods practice and history of sociology *ajs* also seeks the application of perspectives from other social sciences and publishes papers by psychologists anthropologists statisticians economists educators historians and political scientists

this title was first published in 2003 this work examines how christian faith has historically impacted the notion of nous or divine mind in western thought up to and including the present christian faith is seen to have inaugurated an essential transformation over time of the ancient notion of divine mind and of thought in general beginning with an examination of aristotle's notion of essence plato's creation myth in the *timaeus* and plotinus one it is shown how faith in the hands of augustine and aquinas fundamentally reshaped western thought and made possible in the modern period the radical subjectivity of descartes brought to perfection by kant and hegel the strenuous counter thinking of kierkegaard nietzsche and levinas is closely compared to its disarming alternative the thinking of jefferson emerson and c s peirce the father of american pragmatism

the oxford handbook of hegel is a comprehensive guide to hegel's philosophy from his first published writings to his final lectures the handbook includes many essays from younger scholars who have brought new perspectives and rigor to the study of hegel's texts
